

**CANDIDATE FOR CITY COUNCIL MEMBER  
CITY OF HESPERIA**

**NAME: RICHARD HALL**

**AGE: 61**

**OCCUPATION: Manager/Self-employed**

My major goals for running for Hesperia City Council would be paving roads, mitigating traffic, improving public safety, creating well paying jobs by partnering up with the business community, and constructing more park facilities. These are all a function of money and raising taxes is simply out of the question. The solution is escalating retail commercial development, thereby significantly increasing city sales tax revenues. Hesperia's repaving program needs to be ratcheted up. I believe we need to set a repaving goal of 100 miles per year, a increase over the present program. The effort to complete all phases of the Rancho Road project must be doubled, and a high speed north-south corridor for the entire high desert must be planned. Hesperia deserves 10 acres of parks per 1,000 population to improve the quality of our life style and this can be accomplished by teaming up with the Park District. Creative solutions to this problem must be instituted at the earliest possible date. Finally, an auto mall south of Rancho along I-15 and an up-scale quality retail mall at Main and I-15 are an absolute necessity for establishing adequate sales tax revenues for our city.
